To whom it may concern;

In November of 2011 Douglas Gibson worked on getting a couple of particularly nasty dents out of the left rear fender on my Infinity G-35. I was worried that the only possible way I could get them out was to take them to a body shop and have a very expensive repair done. Mr. Gibson assured me that he could get these dents out and that there would be no evidence of them ever being there. I was somewhat skeptical but decided to give it a try. He accomplished exactly what he promised and I was very impressed that he could do this without any sanding and painting. I will certainly use his services again if the need arises. Mr. Gibson was very reasonable in his pricing and extremely courteous and easy to do business with. I give him my highest personal recommendation.

Sincerely,

Frank Dupont
